

DIEGO RODRILLA MIRHAN

(12) 99141-0569 • mirhan.diego@gmail.com • diegomirhan.com • linkedin.com/in/diegomirhan • github.com/diegormirhan

ABOUT ME

Computer Science student focused on Data Science and Machine Learning, participating in Artificial Intelligence research. I build end-to-end local AI solutions — local models (LLMs/Large Language Models), Computer Vision, OCR, and asynchronous data pipelines — as well as full-stack web interfaces (front-end and back-end). Experience optimizing real e-commerce platforms. Advanced English (C1) and Excel.

WORK EXPERIENCE

Software Developer, *Comando Geek Marketplace*

Jul 2024 – Mar 2025

- Administration, maintenance, and development of features on a Geek Marketplace platform, resulting in a 50% increase in user acquisition and retention.
- Performance optimizations and UI/UX improvements using WordPress, PHP, and JavaScript. Link: comandogeek.com.br

Family Business,

Nov 2019 – Jun 2026

- Customer service (online and in-person) — direct communication, teamwork, task and booking management in the hospitality industry, and problem-solving.

RELEVANT PROJECTS

Voice Assistant — 100% local voice AI

2026

- Full-duplex voice assistant with screen awareness for Windows: interruptible conversation with responses aware of on-screen content, fully offline, no cloud and no API keys (GGML + Vulkan).

github.com/diegormirhan/voice-assistant

LLM Inference Benchmark — AMD/ROCm GPU

2026

- Comparative benchmark of 4 LLM inference engines (HuggingFace, vLLM, AWQ, and speculative decoding) on AMD hardware, with real-time throughput, latency, and VRAM telemetry and a Streamlit dashboard.

github.com/diegormirhan/llm-inference-benchmark

Intelligence OCR — local AI document pipeline

2026

- Asynchronous (asyncio) pipeline that extracts structured data from invoices, contracts, and receipts using local vision + LLM models (GLM-OCR, Qwen 2.5 via Ollama), with instant caching in PostgreSQL/JSONB and Docker.

github.com/diegormirhan/intelligence-ocr

All-in-One Downloader Bot — Telegram bot

2023–2025

- Telegram bot for downloading media from multiple social networks — 61 stars on GitHub.

github.com/diegormirhan/all-in-one-downloader-bot

Best Media Tool — React/Next.js website

2024

- Free web tool for downloading videos, photos, and music from social networks; front-end built in React and Next.js, hosted on AWS Amplify.

github.com/diegormirhan/all-in-one-download-app

EDUCATION

Bachelor's Degree — Computer Science, *Cruzeiro do Sul Virtual (UNIFRAN)*

Feb 2025 – Present

- 4th Semester: Calculus 1 and 2, Linear Algebra, Numerical Calculus, and Discrete Mathematics, among others.

TECHNICAL SKILLS

- **AI & Machine Learning:** Data Science, Deep Learning, and NLP — local LLMs (Ollama, vLLM), HuggingFace Transformers, PyTorch, quantization (AWQ), computer vision and OCR, RAG and agents (CrewAI, LangChain), math applied to AI
- **Data Analysis & Visualization:** pandas, NumPy
- **Languages (Programming):** Python, JavaScript, TypeScript, Node.js, PHP, SQL
- **Frameworks:** React, Next.js, Tailwind, Streamlit

- **Tools & DevOps:** Git, GitHub, Docker, WordPress, Figma, Tauri, Electron, CI/CD
- **Databases:** PostgreSQL, MongoDB, Redis (SQL and NoSQL)
- **Cloud:** AWS
- **Other:** REST API, RESTful APIs, asynchronous programming (asyncio), Excel
- **Languages (Spoken):** Advanced English (C1) — reading, speaking, and technical writing; Beginner French (A1)
